

Bema edits:

Move messages up and space space between messages a little less

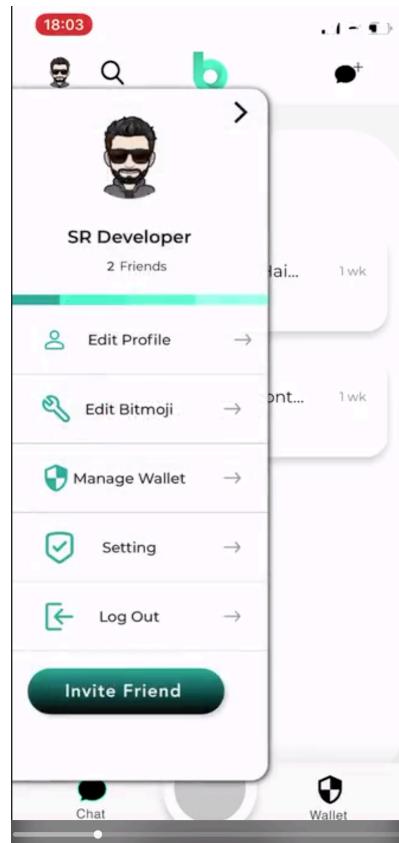

Make the sticker picker full screen

Can resize and relocate sticker in photo/video/AR?

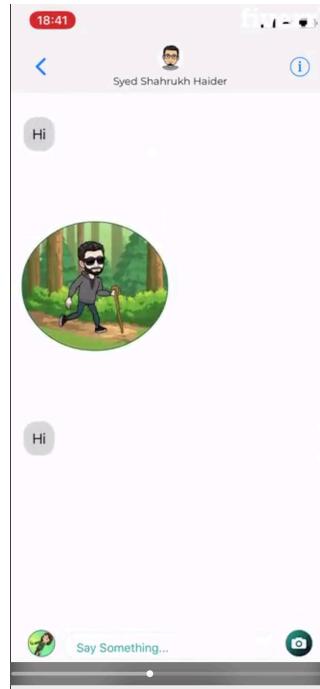

Menu popup - please look closer at the designs

- Left align words
- Align arrows
- Lower invite friend button equal space above & below
- Make buttons a little smaller and make sure are aligned
- Border shadow gray and 15% opacity
- Lower opacity of the lines between options

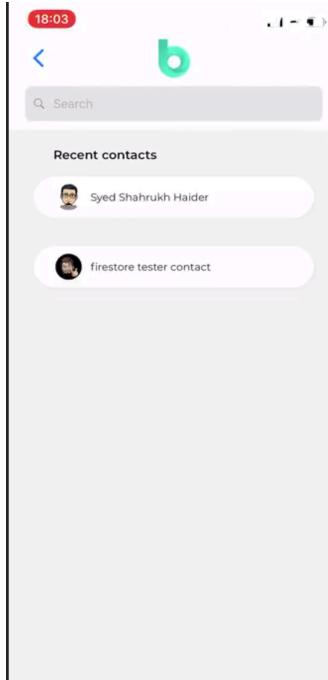

Throughout the app make all opacity of shadows 15%-20%

Shorten the space between text boxes inside chat feature - Hard to tell without testing but does is there a name of who sent the message and time/date?

Search users - move users closer to each other. Lessen the space between.

When sending tokens the message that shows up inside the chat change the word “Send” to “Sent”

SR Developer send 55

When tokens are attached to AR feature please add a “\$” to the token amount and move up barely and align to center of the button
