

## Bema edits:

Move messages up and space space between messages a little less

Make the sticker picker full screen

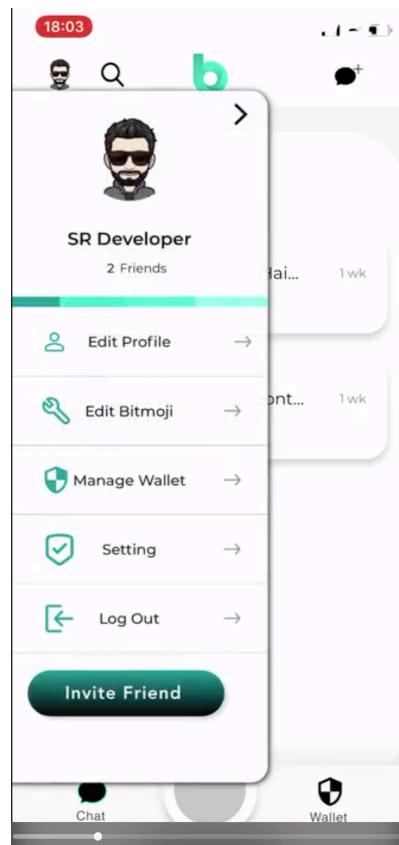

Can resize and relocate sticker in photo/video/AR?

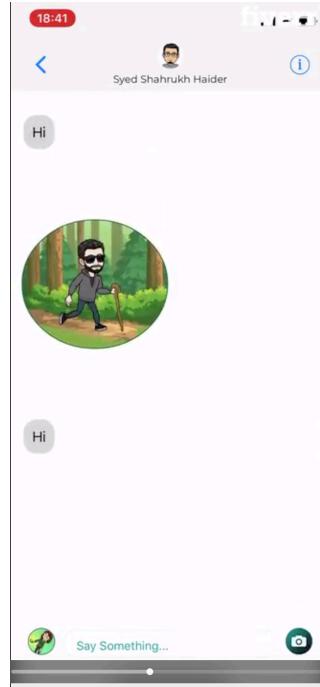

Menu popup - please look closer at the designs

- Left align words
- Align arrows
- Lower invite friend button equal space above & below
- Make buttons a little smaller and make sure are aligned
- Border shadow gray and 15% opacity
- Lower opacity of the lines between options

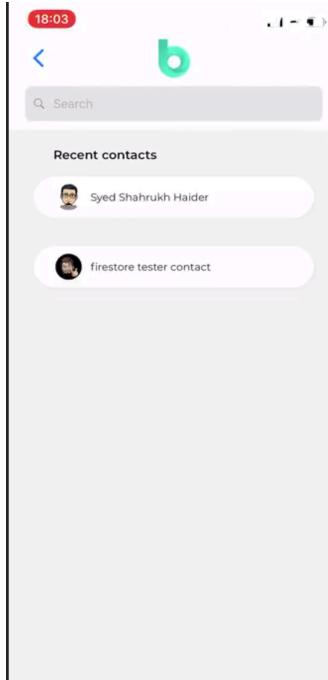

Throughout the app make all opacity of shadows 15%-20%

Shorten the space between text boxes inside chat feature - Hard to tell without testing but does is there a name of who sent the message and time/date?

Search users - move users closer to each other. Lessen the space between.

- When sending tokens the message that shows up inside the chat change the word “Send” to “Sent”

**SR Developer** send 55

- When tokens are attached to AR feature please add a “\$” to the token amount and move up barely and align to center of the button
